

GALAXY & TESS

Designed for riders who value comfort, easy handling, and dependable performance, GALAXY and TESS are the ideal choice for all-mountain exploration, powder days, and first park runs. Both boots use a BOA® Coiler system for quick and effortless lacing, paired with a Perfect Fit Liner that can be heat-molded for a personalized fit.

The integrated Heel Lock System and Wrap Fit keep the feet in place during movement for better performance. With a forgiving flex and supportive construction, they strike the perfect balance between control and comfort – making them a great companion for riders progressing their skills or simply enjoying long days on snow.

TESS translates the all-round qualities of the GALAXY into a women-specific boot, featuring a fit and cuff shape tailored to the female foot and leg anatomy and softer flex for added comfort, stance, and efficiency.

EFFORTLESS LACING

BOA® Coiler system delivers fast, even tightening with a simple turn.

COMFORT YOU CAN FEEL

Forgiving flex supports progression while staying easy on the legs and feet.

PERSONALIZED FIT

Heat-moldable liner adapts to your foot; women-specific fit in TESS ensures optimal comfort and efficiency.
